Professional Summary

Full Stack Developer with 2+ years of hands-on project experience in modern web development. Skilled in Python, SQL, JavaScript, TypeScript, React, HTML, and CSS, with strong expertise in frontend engineering, UI/UX, and AI-powered applications. Actively developing expertise in AI, Machine Learning, and Data Science.

Technical Skills

Languages & Core:	Python, TypeScript, JavaScript, HTML, CSS, SQL
Frameworks & Libraries:	React, Node.js, Express.js
AI & Machine Learning:	Agentic AI (CrewAI), Prompt Engineering, Data Analytics
Cloud & Databases:	Supabase, MongoDB, Vercel, Render, Railway
Tools & Methodologies:	GitHub, REST APIs, API Integration, Version Control, UI/UX Design

Experience

Independent Software Consulting **Feb 2026 - Present**

Full Stack Developer *Remote*

- Architected and developed a fully responsive institutional website for Eklavya Group Tuition, ensuring seamless performance across desktop, tablet, and mobile devices.
- Designed intuitive UI/UX to improve student and parent engagement while enhancing accessibility and navigation.
- Managed the complete development lifecycle, including planning, development, testing, deployment, and ongoing maintenance.

5x Hackathon Finalist **2026**

- Finalist at Cognivia, Odoo Hackathon 2026, Odoo x LDCE Ahmedabad, HackBaroda, and FlowZint AI.
- Associated builds include Dealflow360 (Team StackForge), SafePath AI, CiteMind, and the FlowZint support-chatbot track.

Projects

ProofDesk AI | *React, Python, GenAI APIs, Supabase, Vercel* Live Link

- Built a full-stack AI document analysis platform delivering semantic search, summarization, and contextual Q&A, using React, Python, and GenAI APIs, with Supabase for storage/auth and deployment on Vercel.
- Solved unstructured document parsing and context-retention challenges by implementing structured chunking and embedding-based retrieval, improving response accuracy.

Viral Content AI | *Python, CrewAI, Next.js, LLM APIs* GitHub Repo

- Built a multi-agent AI workflow using CrewAI and Next.js that automates trend research and content generation via LLM APIs.
- Resolved multi-agent coordination and output-consistency issues by designing structured pipelines, refining prompts, and adding validation layers - prototyped to demonstrate scalable AI content automation.

TalkToLead | *React, Node.js, Express.js, Supabase, REST APIs* Live Link

- Built an AI-powered conversational platform automating lead qualification, with a responsive dashboard for managing leads and business inquiries.
- Solved real-time conversation flow and lead-data accuracy challenges through optimized API response handling and structured conversation logic.

Education

Gandhinagar University **Expected 2029**

Bachelor of Technology in AI

IIT Roorkee + Microsoft Joint Initiative **2026 - 2027 (Currently Pursuing)**

Elite AI & Data Science Certification Program
